

Join Us for a Webinar on
July 21st at 2:30-4:00 p.m. EST:

What's at Stake? *Environmental Justice and the EPA's Clean Power Plan*

On June 2, 2014, the EPA proposed the Clean Power Plan to reduce carbon pollution from existing power plants while maintaining an “affordable, reliable energy system and protecting our health and environment now and for future generations.”

This webinar led by environmental experts will highlight some of the key issues of the Clean Power Plan affecting low-income communities, communities of color, and others that are directly impacted by existing power plants

The webinar will equip listeners with information on how to participate in the public-commenting process at the state and federal levels.
